

BJU Press Curriculum is used in all subjects.

Bible Truths 3: Following Christ explores Bible accounts in the Old and New Testaments and encourages solid Bible study skills. Missionary stories and stories from church history are also included to inspire students and help them apply biblical principles to their everyday lives.

English 3 incorporates the following: biblical worldview shaping, standard English conventions, and writing. The course integrates speaking, listening, and viewing activities into the lessons. Lessons present language skills as essential tools for oral and written communication in five areas of life, encouraging students to formulate a biblical worldview of communication in their lives. Communication is important to help us maintain friendships, interact properly with authorities, get work done, celebrate what we enjoy, and connect with people who are different from us.

Handwriting 3 reinforces good handwriting habits and establishes a consistent, legible writing style. Handwriting practices include copying poems, paragraphs, Bible verses, and writing personal compositions.

Heritage Studies 3 relates in understandable language the story of America from the framing of the Constitution up until the days of the Wild West. Students will relive key moments in our nation's history and discover interesting traditions from the past.

Math 3 teaches place value, multiplication, division, and fractions. Students will be challenged to think more deeply about their calculations and the implications of math on their worldview. Throughout the course, students will focus on four basic themes: math is a tool to help people work; math shows the world is designed; math helps people help people; and math has limits. Special characters in the worktext work together with the reviews, manipulatives, and visuals to constantly drive students to both enjoy the subject and apply what they are learning.

Reading 3 deepens reading skills and comprehension by providing a collection of engaging reading material for the 3rd grade level. The two-volume reading text guides students as they build reading comprehension, grow in phonics skills, and absorb character-building stories that demonstrate biblical truth and timeless virtues.

Science 3 provides age-appropriate scientific information through text, diagrams, and charts, as well as captioned photographs, illustrations, and special interest boxes. Each section ends with Quick Check questions to assess student understanding. The first pages lay a foundation building a biblical worldview.

Spelling 3 teaches students to apply more generalizations to word families and give extensive practice in adding suffixes. Expanded dictionary skills, guided journal entries, and Bible word studies are all key components of the 3rd grade spelling educational materials. Each lesson provides enjoyable activities to help students remember the spelling words they learned.
